A typhoon taking an unusual route across Japan is forecast to reach Honshu over the weekend. \*The Meteorological Agency asks people in western Japan to be very careful about further landslides and flooding after the rain disaster earlier this month. At 6 p.m. Friday, Typhoon Jongdari, the season's 12th storm, was moving north over the Pacific Ocean at 30 km/h. It was bringing heavy rain and winds to the remote Ogasawara Islands some 1,000 km south of Tokyo.

“The storm is likely to gradually shift northwest and gain speed as it approaches Kanto on Saturday afternoon. After moving through Kanto, it is likely to turn west toward central and storm-hit western Japan through Sunday,” said Ryuta Kurora, the agency's chief forecaster. He warned of flooding, landslides, high waves and strong winds, and urged people to check neighborhood hazard maps to prepare if local governments issue warnings. He also emphasized the importance of being aware of the latest information because the typhoon may take a course different from the forecast. Two days ago, Jongdari, which means skylark in Korean, was predicted to cross Honshu from southeast to northwest while it travels towards the Sea of Japan. The typhoon could bring up to 500 mm of rain to eastern Japan, up to 400 mm to central Japan and 300 mm to western Japan over a 24-hour period ending noon Sunday.

Earlier this month, western Japan was hit by heavy rains. Much flooding and landslides killed more than 220 people in 15 prefectures, including Hiroshima and Okayama. “Special caution is necessary in areas hit by the \*torrential rains in western Japan where landslides and flooding can easily occur,” Kurora said. In the city of Kurashiki in Okayama, an official volunteer center decided to cancel its activities from Saturday to Monday. “The typhoon is forecast to hit Okayama on Sunday, but residents must move to a safe area early. If volunteers have to come out on Saturday, that could slow their efforts,” said Toshifumi Ohashi, a Kurashiki city official sent to the center. He said Monday's activities, mainly cleaning flood-hit homes, were also called off as residents might not be ready to accept volunteers.

After typhoons usually move northeast over Japan, the weather often becomes dry and pleasant after they pass. “Jongdari's movement west will likely be followed by changeable weather, including heavy rain and tornadoes,” Kurora said. Prime Minister Shinzo Abe said that people should be on heightened alert for the approaching typhoon to a government meeting

dealing with the western Japan rain disaster. The Sumida River Fireworks Festival on Saturday was postponed until the next day. Organizers in Tokyo will decide whether to hold the annual festival by 6 p.m. Sunday. Another fireworks festival on Saturday at Showa Kinen Park, Tokyo, was canceled, organizers said.
