Nearly everyone gets hiccups, but there's no common way to get rid of them. However, a 13-year-old girl may have the answer. Her invention is called "Hiccupops," and the teen who invented "Hiccupops" in her kitchen is sure she has discovered something big. In fact, 13-year-old Mallory Kievman hopes to get her invention into every household.

The hiccups can be a big problem for people. Common causes of hiccups include eating too fast, drinking too much, or swallowing too much air. While doctors do not have a cure, Mallory has a simple idea: a lollipop. Mallory said she thought of the idea when she was having problems with hiccups a few years ago. She said, "I wanted them to stop, so I researched some ways to stop the hiccups."

She decided to mix three of the ingredients that stopped her own hiccups, sugar, water and an apple cider vinegar mix, and came up with the "Hiccupop." She said, "The ingredients in the lollipop change a set of nerves in your throat and mouth that causes hiccups."

Mallory has not tried any scientific studies, but she found her lollipops deliver relief in about 80 percent of a small group of friends and family who have tried them. So far, she has only been making her lollipops in her kitchen, but she hopes to see "Hiccupops" in stores across the country.
